

urbanphenomena: design+research

Established in Jeddah on the 3rd of November 1999, urbanphenomena is a multi-disciplinary studio that lives at the intersection of design disciplines that deal primarily with the built environment. Our areas of expertise integrate Architecture, lightweight structures, Interiors, Graphics, Lighting & Wayfinding. Through observation and research our approach identifies unique socio-cultural traits to help us delineate our local culture. We use these insights as a basis for contextualizing current projects, and also to introduce them to a wider audience through a combination of writing, events, and publications.

urbanphenomena Area of Activities:

Our partners in Lightweight structures:

Our partners in Wayfinding:

Our partners in Lighting:
